

## Case Studies

### Galway Credit Union Gets ACT Revamp with eLock System

The Claremorris Credit Union needed to upgrade its access control hardware.

#### Brief

The Claremorris Credit Union needed to upgrade its access control hardware.

#### Solutions Provided

The ACTpro eLock system on six doors, replacing a magnetic lock system. The eLocks, which can be fitted to any door, were quick and easy to install with minimum disruption to the client.

Unlike traditional wired solutions, which typically come with a controller, power supply, mag locks, break lock unit, door reader and associated

cables, the ACTpro eLock solution comes with just the eLock hub and the eLock itself.

The eLock communicates with the hub, which in turn communicates all data to ACTenterprise, the eLock software, where clients can monitor and control door access.

**Installer:** DC Security are a Galway based security installation company.
