### Acre security to attend The Security Event, Birmingham from April 25 – 27, 2023

*Acre security is excited to announce we will attend The Security Event in Birmingham, England. The Security Event at NEC, Birmingham will take place between the 25th and 27th of April 2023 and **acre security** will be exhibiting at Stand #4/G95.*

#### **What is The Security Event, Birmingham?**

Designed by the industry for the industry, The Security Event returns to the Birmingham NEC over 25 - 27 April 2023, reuniting installers, integrators, manufacturers, distributors and end-users. The exhibition will showcase the world's leading security brands, offering you the best opportunity to source the latest products, technologies and solutions, whilst networking and meeting face-to-face with key experts from across the industry. Ensure you're up-to-date with the latest developments and issues in security via our

comprehensive education program.

### **What to expect at this event:**

At The Security Event, Birmingham, acre security will be highlighting our newly unified solutions, such as Feenics Cloud-Based Access Control the **TDS Visitor Management System**. These solutions provide better protection for multi-site, multi-system, and highly complex situations within global organizations. Acre security will also demonstrate its latest range of intrusion detection systems alongside the **Razberi** cyber secure monitoring software and hardware with SSIQ.

Acre security is also excited to showcase the recently launched **Access It!**, a solution which is a powerful and user-friendly software that allows users to select the feature sets required to build and scale at a cost-effective solution with deep integrations to cutting-edge technologies.

"We are excited to be present at The Security Event this year and have the opportunity to demonstrate the powerful capabilities of our cloud-based technologies, touchless access control solutions, and mobile services," said **Ross Wilks**, Head of Marketing Communications at acre security. "These advanced solutions have emerged as more scalable, secure, and flexible options for businesses of all sizes. We look forward to working closely with our customers and partners to transform security efforts and support more efficient operations."
