

## News

### August Customer Newsletter Recap

*Our August newsletter was dispatched to our customer base on Thursday, 5 August.*

Check out some of our main highlights from the dispatch:

- Two years into his role as Senior Product Manager for SPC, Alexander Scheffold reflects on the award-winning intrusion alarm system's journey since its original conception. "FlexC was built from the ground up solely with cybersecurity in mind," Scheffold says. [Read More.](#)
- Included in this update are features like the support of custom card format, integration with NetworkOptix, and more. **ACTpro 3.1** will also support custom Wiegand card formats that can be sent to individual controllers. [Read More.](#)

- In 2020, ACTpro introduced intelligent vehicle management through **ANPR**, an effective and low-cost solution. When the camera detects or recognizes a vehicle number plate, access can be granted when the detected license plate numbers match the vehicles registered in the user database. **[Read More.](#)**
