Webinar

Cyber Security and Health Management for your Video Surveillance and IoT solutions

Presented by Iain Deuchars (General Manager at ComNet) and Fraser Johnston (Technical Network Specialist at ComNet)

ComNet's Iain Deuchars and Fraser Johnston recently presented a webinar on cybersecurity and health management for your video surveillance and IoT solutions at a virtual event hosted by A&S Adria.

The webinar covered a range of topics on the subject, such as:

- Razberi - A combined solution for secured storing, hosting, transmitting and monitoring of your IoT application.
- Highest availability of your surveillance system with global observation.
- The simplicity of everything in one box.

- Camera & Appliance Defence firmware to cybersecure products.
- Hardened edge devices to be installed in an unconditioned environment.
