ComNet launches Product Selector Tool

Wiesbaden, Germany, February 2022 – ComNet, a global leader providing state-of-the-art transmission solutions, announced the launch of its new Product Selector Tool today.

This tool helps you quickly search the entire ComNet catalog of products ranging from Wireless Ethernet, SFP Modules, Solar Systems, and much more with a few simple clicks.

Iain Deuchars is General Manager at ComNet International. Commenting on the launch of the ComNet Product Selector tool, **Deuchars** states:

“The platform is straightforward to use and. We believe this tool is a top-class service, created to make life as simple as possible. By enabling our customers to efficiently browse through our product catalog in such an organized and presentable manner, it will make their

lives easier, as well as quickly highlighting the depth and benefits of our entire range.”

Deuchars further explains how customer-friendly the tool is: “Once the solution the customer is looking for is found, there is the option to purchase directly from the ComNet webshop.”

In addition to the launch of the Product Selector Tool, a PSU Cross Reference Guide and a Switch Cross Reference Guide are also being launched by ComNet. These online guides provide a quick and efficient means for customers to identify compatibility requirements with ComNet solutions. These are yet another example of ComNet’s forward-thinking approach to a customer-first strategy.
