### March Product Recap: Bluetooth Modules & Razberi Hardware

*ACRE released two new products to the market in March, as well as two new services for customers to enjoy.*

Follow our recap of the new releases below:

#### **Bluetooth Modules**

Vanderbilt's Bluetooth modules allow customers to leverage the investment in their current access control system by conveniently and economically adding Bluetooth credentialing capability. Adding a Bluetooth module is similar to adding a new OSDP or Wiegand reader.

## Razberi SSIQ Hardware

Razberi SSIQ hardware products are now available in the EMEA and APAC regions. The initial release will focus on the integrated server storage and Ethernet switch SSIQ8 port products. These offer unique solutions in conditioned and unconditioned environments, coupled with bestpractice cybersecurity features. [Read more.](#)

## GTS App

The new Vanderbilt Technical Services App delivers all of the company's technical information to one place. This means users can access FAQs, the company's Download Center, and E-learning platform from one central, convenient location. [Read more.](#)

## ComNet Product Selector Tool

This tool helps you quickly search the entire ComNet catalog of products ranging from Wireless Ethernet, SFP Modules, Solar Systems, and much more with a few simple clicks. [Read more.](#)

## Phase Out of Obsolete ComNet Products

A number of ComNet products were made obsolete due to component changes creating performants limitations with devices. [Read more.](#)
