### Q1 2022 Recap: New Service Tools & Bluetooth Modules to Retrofit Readers

*The first quarter of 2022 was an eventful one for Vanderbilt and ComNet.*

The first three months included the release of new services like the GTS App and ComNet Product Selector, as well as a new easy-to-install Bluetooth Modules that enable VR and OSDP readers the ability to quickly upgraded to Bluetooth capability in the field.

Recap our key highlights from January, February, and March.

#### **The Transport and Logistics Sector:**

Warehouses and logistics centers often encompass large-scale operations with several buildings spread over large areas. Many doors and gates need to be secured, while it

should also be easy for staff and visitors to load, unload and distribute goods. But another vital section of this security block is **access control** to carparks and loading areas where delivery trucks come and go consistently throughout the day, seven days a week. ### **Intersec Dubai Reflection:**

CRE brands Vanderbilt and ComNet attended Intersec Dubai alongside sister-companies TDS and Open Options. The event, which took place between January 16-18, allowed the ACRE brands to showcase their wide-ranging high-quality security solutions across multiple product lines. [Read the reaction from some of the ACRE team that attended the show.](#)

### **Sustainability Rankings:**

Vanderbilt and ComNet recently scored a Bronze medal in the Ecovadis sustainability rating audit, the world's most trusted provider of business sustainability ratings. The ACRE brands secured the bronze by ranking in the top 16 percentile for Sustainable Procurement and ranking in the top 27 percentile for Ethics. [Find out more about our bronze medal win.](#)

### **GTS App:**

The new Vanderbilt Technical Services App delivers all of the company's technical information to one place. This means users can access FAQs, the company's **Download Center**, and **E-learning platform** from one central, convenient location. The App, built with a responsive design suitable for all devices, can be downloaded for free by searching for "Vanderbilt Technical Services" in either the App Store or Google Play and is the latest evolution from the company's **Global Technical Services team**. **Read more about this fantastic new app here.**

### **ComNet Product Selector Tool:**

This tool helps you quickly search the entire ComNet catalog of products ranging from Wireless Ethernet, SFP Modules, Solar Systems, and much more with a few simple clicks. **PSU Cross Reference Guide** and **Switch Cross Reference Guide** were also released. **Learn about these new ComNet service tools.**

### **Bluetooth Modules:**

The latest Vanderbilt Bluetooth addition complements their reader range by allowing any Vanderbilt OSDP or Wiegand VR series reader (VR10S-MF, VR40S-MF, VR20M-MF, VR50M-MF) to be converted into a Bluetooth reader. Additionally, it supports credentials issued via a **VCredential portal (VCredential.com)**. **Read our complete product announcement for this product release now.**
