Reader Compatibility Chart: How-to

The Vanderbilt Access Control Reader Compatibility chart does exactly what it says on the tin.

Vanderbilt's Reader Compatibility chart does exactly what it says on the tin and is a very useful resource for our customer base.

The chart is a great visual aid in helping customers of Vanderbilt quickly identify which of our readers are compatible with our access control systems. The chart is located under the Resources section of our website.

How the Reader Chart works:

Filter the readers by clicking on the options at the head of the chart. For instance, "Bluetooth" or "Biometrics" etc.

Access Control Readers Compatibility

[Smart Card](#) |
 [Proximity](#) |
 [Cotag](#) |
 [Long Range](#) |
 [Biometrics](#) |
 [Bluetooth](#) |
 [Door Entry Phones](#)

Product	WebShop	ACT Enterprise	ACT365	Granta	OMNIS	SiPass Entro	SiPass Integrated	SPC	Notes
VR10S-MF  V54504-F101-A100	EN DE SE FR IT ES	✓			✓		✓	✓*	* Connection to SPC using OSDP converter ONLY
VR40S-MF  V54504-F102-A100	EN DE SE FR IT ES	✓			✓		✓	✓*	* Connection to SPC using OSDP converter ONLY

The chart will then whittle down the available readers at your disposal for each category.

Product information "BLUE-A Bluetooth Reader, Wiegand"

Vanderbilt's range of Bluetooth Readers is a secure and flexible identification solution bringing the access credential to Android and iOS smartphones. Bluetooth Low Energy (BLE) is transforming the future of access control and removes the need for a physical card or tag. Simultaneous support of smartphones and a wide range of smart cards bridges the gap from traditional access credentials to cardless mobile access control and allows a seamless integration into existing locations. Available communication interfaces: • BLUE-A: Wiegand • BLUE-B: Wiegand (with keypad) • BLUE-C: OSDP • BLUE-D: OSDP (with keypad)
