Review: Vanderbilt highlights from IFSEC London

The three-day IFSEC International Conference and Expo was a sight to see as more than 27,000 attendees from around the globe descended on London's ExCeL to attend the event. Central to the show was the exhibit hall, where manufacturers across the industry demonstrated the products, services, and solutions designed to keep people safe and add more intelligence to comprehensive security plans.

In a time where threats are becoming more diverse and complex, caused in part by rapidly developing technology, the tools, and knowledge required to combat attacks are becoming equally diverse. As a result, IFSEC itself is transforming into an integrated security event, bridging the gap between physical and cyber with innovative new products, education central to this mission, and the opportunity to share ideas and knowledge with fellow attendees.

Portfolio

As part of this new vision for IFSEC International, Vanderbilt showcased its wealth of knowledge and product innovation that encompasses the integrated approach to security alongside its sister company ComNet, demonstrating the power of connectivity and advanced security tools to meet the needs of today's enterprise organizations. Vanderbilt showcased the ability of its [upcoming release of ACT Enterprise access control solution](#) during the show, emphasizing the need for advanced wireless integrations and smartphone app functionality. The system gives users the power to access the network, receive notifications, and administer access rights - all from the palm of their hand.

Vanderbilt's Executive Vice President - Global Sales David Sullivan [sat down with IFSEC Global](#) to discuss the company's developments, including the incorporation of video into access control and the ability of intrusion alarms to send push notifications directly to mobile applications on a user's smartphone. [SourceSecurity met with Vanderbilt leaders](#) to discuss the company's focus on integrations during the show, noting the critical integration between the SPC intrusion detection system and software from Milestone. Additionally, Vanderbilt's ACT Enterprise now integrates with ASSA ABLOY's Aperio wireless locking solution.

ACRE

Vanderbilt's parent company, ACRE, was also on site to offer support for its brands during the show. ACRE CEO Joe Grillo was recognized during this year's event as a [2018 IFSEC Global Security and Fire Influencer](#) in the Security Tech Leaders category for his ability to drive technological innovation and elevate the industry globally.

While IFSEC is over, Vanderbilt continues to embody its mantra to be Ready for Any Challenge as customers look to the company to solve some of their most challenging security problems, building integrated, robust and scalable solutions that will serve them well for years to come. Till next year, IFSEC.
