IFSEC 2018: What to expect from Vanderbilt at stand F305

IFSEC 2018 kicks-off tomorrow in London. Here's what visitors to Vanderbilt's stand F305 can expect to see:

ACT Enterprise

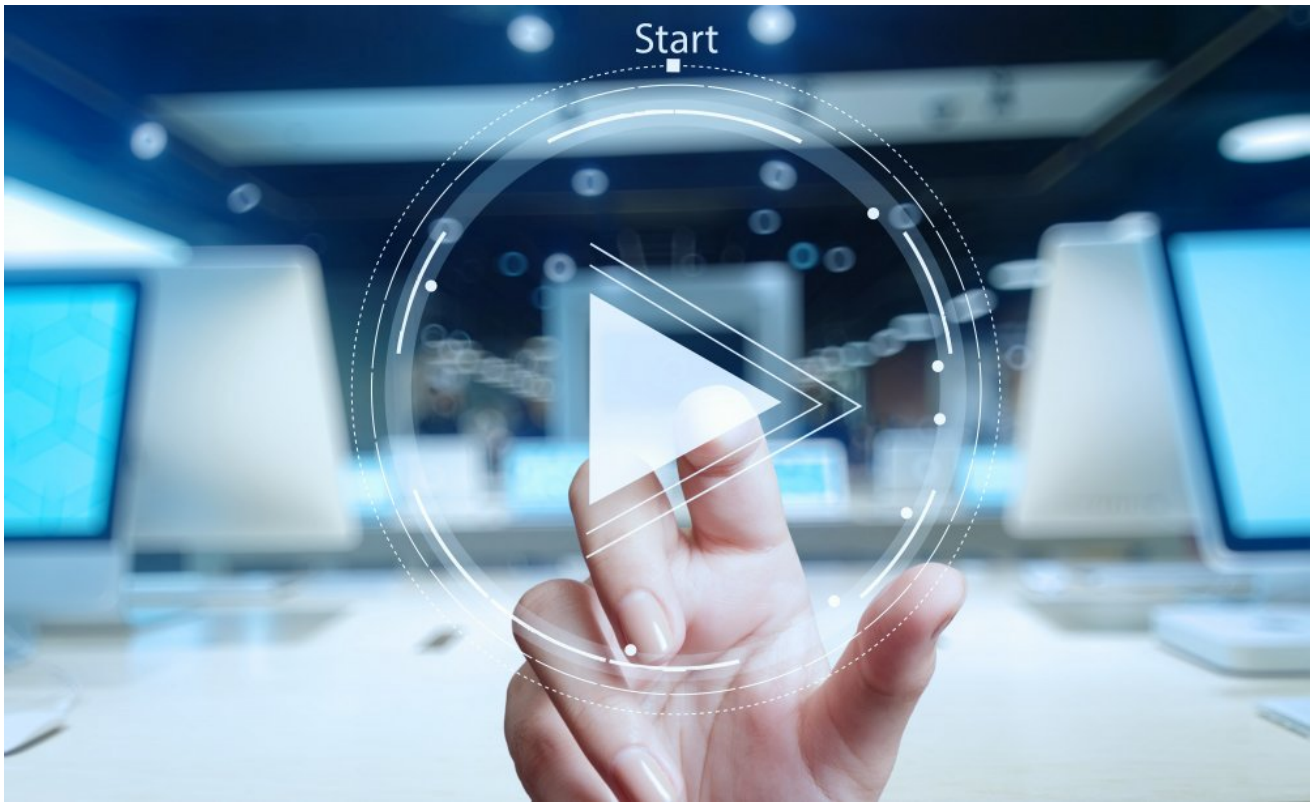

- Intuitive and easy to use software
- Role-based software with modules for the security guard, administrator, and installer
- Design and Print ID cards

- Rules engine
- Smartphone app

Vectis iX

- The current release from Vectis iX comes with a new feature for ATM integration
- Capture text-based info from bank/card during a transaction
- Event triggered effects based on filters to trigger action on the recorder
- Assign multiple cameras to an ATM for investigation

SPC Wireless devices

- Easy to mount, pair, and configure
- Extended wireless range
- Extended battery life and common batteries across multiple devices
- Configure remotely
- Designed to EN approval standards

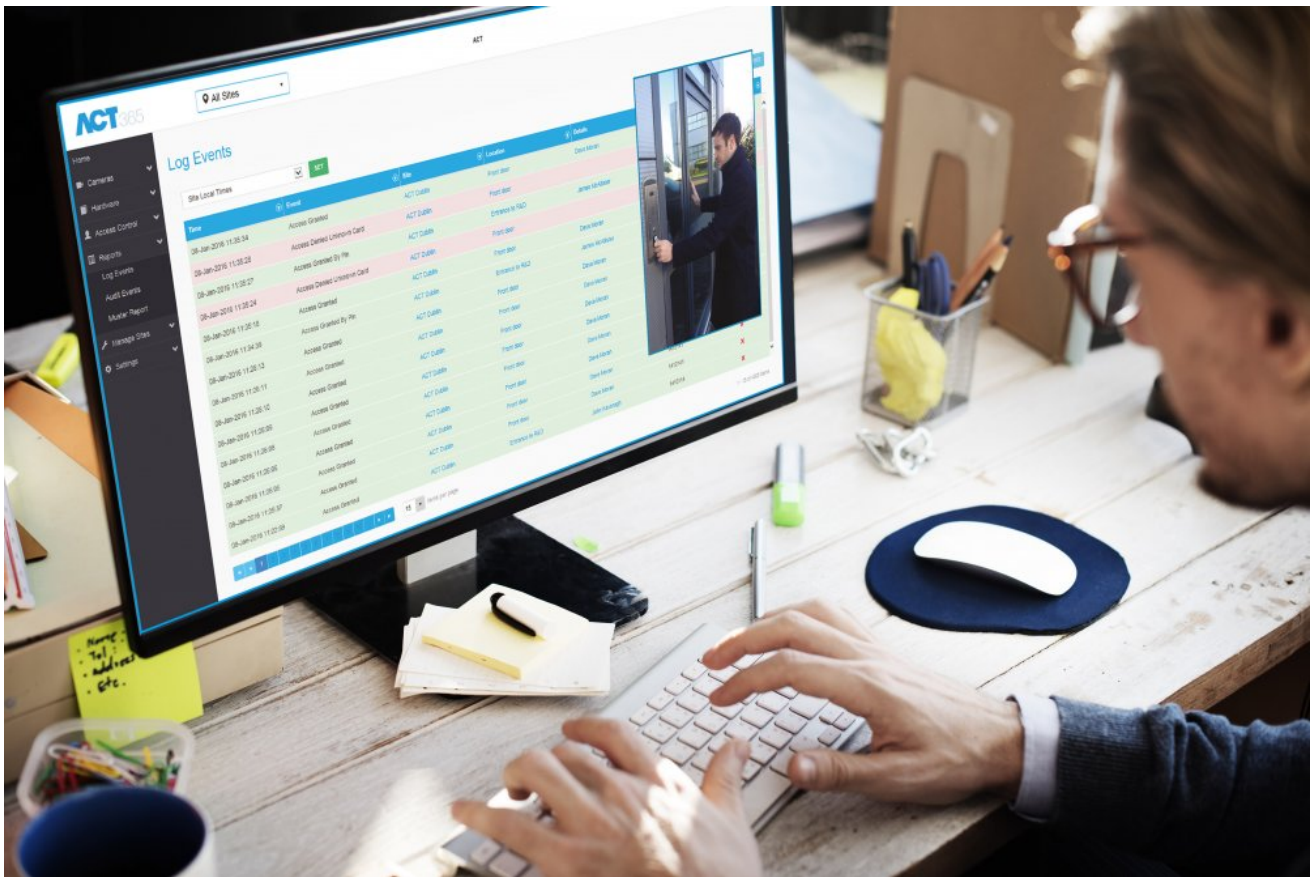

SPC Connect

- SPC Connect is an innovative remote management tool
- Monitor, manage, and maintain SPC panels from any location with internet access
- The system is scalable, secure, stable and future proofed
- SPC is one of the most secure intrusion product ranges available

ACT365

- Award-winning Software-as-a-Service-based access control and video management software
- Remote management of multiple customers and sites
- No more costly PC/Server installations
- Installer and customer portals and app
