VOTE! Two Vanderbilt Products Nominated for PSI Premier Awards

Vanderbilt has been nominated twice for this year's PSI Premier Awards. The UK publication has nominated the company for its SPC and ACT365 products.

SPC has been nominated in the Intruder Product of the Year award, while ACT365 represents our interests in the Access Control Product of the Year category.

The products were nominated over the last two months as PSI magazine asked their readers what technologies they have installed or read about in the last year that has given them the best results. Features, benefits, ease of installation, and best service were all factors that had to be taken into consideration, so these nominations are a huge testament to SPC and ACT365's capabilities.

SPC protects businesses, properties, and assets. It is an intrusion detection system that offers versatile and comprehensive alarm management functionality. Through the use of cloud services, End-user apps, and a dedicated software suite, SPC is at the forefront of modern intrusion detection. ACT365 is Vanderbilt's complete access control and video management solution, that offers remote setup, servicing, and support.
