Industry bytes: SPC's power to the user

SPC is known as a powerful intrusion system, but you may not know the full potential available to SPC system users.

Using the SPC user model, users can have multiple rights and relationships defined quickly and efficiently allowing for access to doors and areas to be determined. The SPC solution also provides a range of support tools for the installer meaning that training your customers or showcasing the solution has never been easier.

The free SPC Connect Demo app can showcase how a system will behave, and users can gain experience in using an SPC system within the demo site. The SPC Connect platform delivers a vital tool for installers that enables them to quickly add users to both the system on site and set up their remote access.
