### SPC updates firmware

*Vanderbilt's SPC's firmware has been updated to version 3.13.*

SPC, the **award-winning intrusion detection system**, updated its firmware to version 3.13.

The firmware includes several enhancements and minor bug fixes. A highlight of the release includes support for the new two-way wireless keypad WPK-SIM.

The two-way wireless keypad enables the setting and unsetting of the SPC system, and should be used in conjunction with the SPC Connect Mobile App 1.7.2 for iOS and Android.

**The two-way wireless keypad:**

- is supplied as a wall-mounted keypad complete with batteries and two PACE fobs.
- has EN grade 2 approval from Telefication.
- has various panic options, 3 years battery life, discrete and easy to use.
- color-coded icons to assist with the use of the system.

## How to get it?
