**Save time and
money with
contactless
access control**

Valid until 31st December 2020

**20
FREE
credentials!**

What is VCredential?

VCredential is a cloud-based credential management platform that offers users the ability to create and manage Bluetooth credentials independent of the access control platform. VCredential's key benefit focuses on intuitive usability and the opportunity to benefit from the latest industry technology trends.

Through VCredential, all Vanderbilt systems, including ACTpro, OMNIS, ACT365, SPC, as well as multiple thirdparty partner systems such as SiPass integrated, support Bluetooth Low Energy readers and accessories.

Moreover, following a global pandemic, virtual credentials have never been more apparent or needed. As such, virtual credentials will provide end-users with a seamlessly smooth user experience.
